*ADJUST YOUR POWER*

## PEDALS FOR WELDING MACHINES AND INDUSTRIAL APPLICATIONS

Enter the welding industry with the maximum precision and control thanks to our latest generation welding pedal.

This tool is designed to give yourself the power, allowing you to precisely adjust the intensity of the weld with the simple movement of your foot.

Its solid and durable structure ensures a long life, while the ergonomic design allows you to work comfortably and effortlessly for hours.

Reliable, precise and easy to use, our welding pedal is the essential accessory for professionals who seek excellence in their welding operations and more.

Therefore, it can be used for many other industrial applications, where a constant and precise adjustment is required.

Don't settle for less when you can have instead a maximum performance and durability. With our pedal, your work becomes more efficient, safer and more profitable.

Discover with us the future of the industry!

# TCP - 23 FOOT CONTROL

## RESISTANT

The nylon and fiberglass shell makes the TCP-23 foot control extremely resistant up to over 200°C, perfect for the welding environment.

## ACCURATE

The TCP-23 is accurate thanks to its innovative internal scaling system. More precise pedal, better weld.

## ECO and PRO

Available in 2 versions:

**ECO:** designed for traditional industrial environments

**PRO:** designed for more specific industrial environments, it provides a greater protection to the internal circuit

## 100% SAFE

TCP-23 has the IP54, is C.E. and RoHS certified.

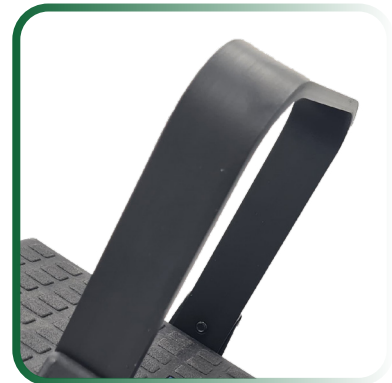

# CUSTOMIZABLE WITH MANY ACCESSORIES

**REAR FOOT HOLDER**

**RISER BRACKET**

**RECLINING BOW**

**ADDITIONAL EXTERNAL SETTINGS**

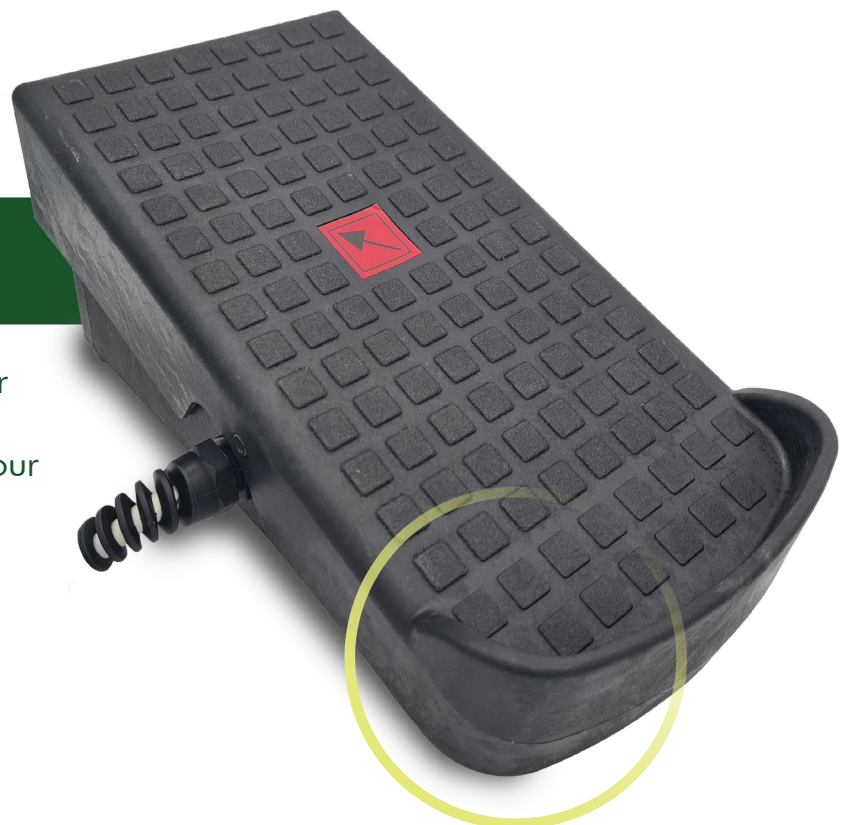

## RECLINING BOW

The reclining bow allows to easily move and transport the pedal, while offering you additional foot protection. It is available both fully closed and open on one side.

## REAR FOOT HOLDER

The rear foot holder is useful to improve your performance and comfort level during the welding process since it allows you to lean your heel while resting.

## ADDITIONAL EXTERNAL SETTINGS

Designed to offer one or more additional adjustments, they are integrated with the pedal but remain easily accessible from outside.

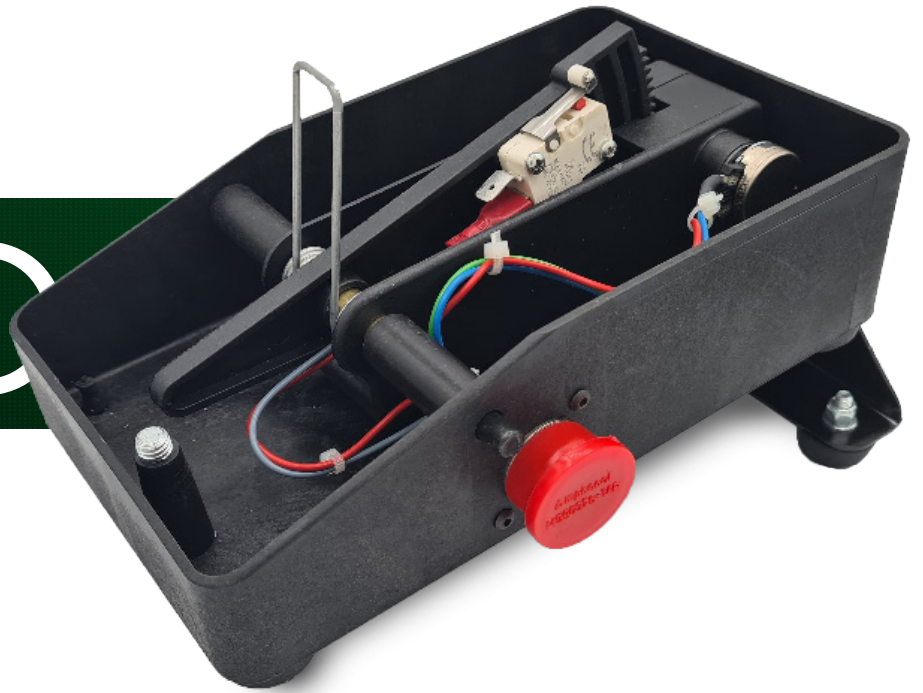

## RISER BRACKET

The riser bracket allows you to keep the pedal in a more sloped position, reducing fatigue during prolonged uses.

# ECO

The **ECO** version is designed for less-demanding industrial applications. It is the most practical choice for those looking for an affordable alternative.

The **PRO** version guarantees a high level of performance and a long-lasting quality and is designed for more demanding industrial applications. It is the ideal choice for professionals requiring reliability and durability over time.

# PRO

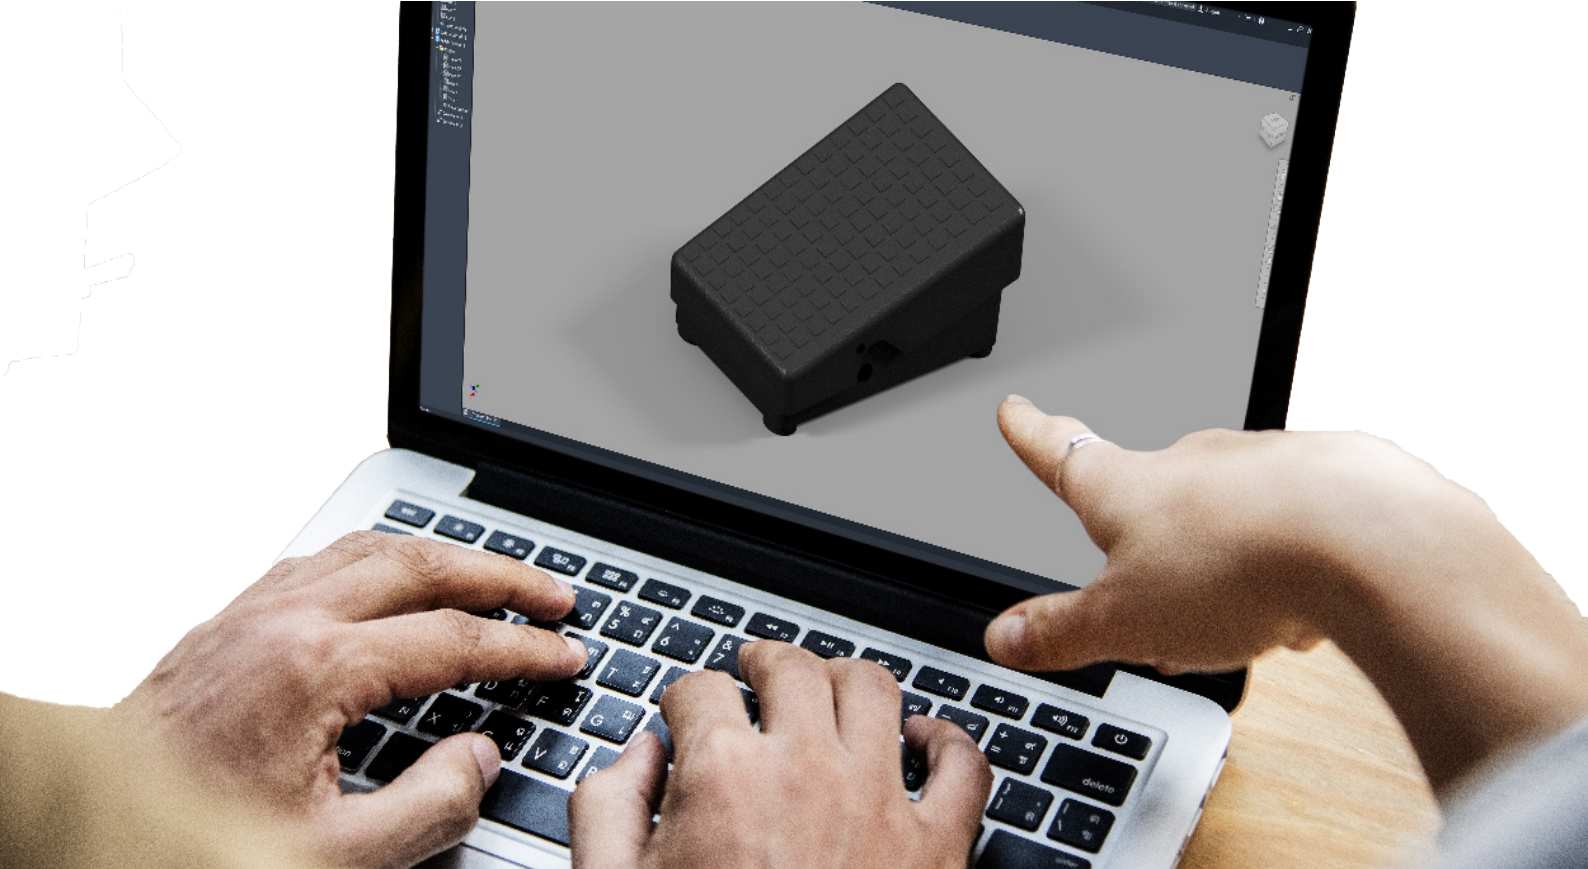

POTENTIOMETER  
SHIELD

ADDITIONAL WIRE PROTECTOR

FAIRLEAD SPIRAL

## CUSTOM-MADE PROJECTS

Do you need a particular command or a specific accessory for a special application?

No problem. Contact us!

Thanks to the experience of over 40 years gained in this field, we will be able to give you advice and help you.
